

Advantages of Microsoft 365 with hosted Exchange

#1 Cheaper than local licenses

By using Microsoft 365, you don't have to buy single licenses anymore and your updates are managed automatically. In addition, you always benefit from the latest version of Office

#2 Flexible and clear cost

Microsoft 365 is a cloud service with a monthly subscription fee per user. Users can easily be added or removed on a monthly basis.

#3 All your files are securely stored in the cloud

Online file storage is a lot more secure than storage on a local computer or server.

- Your files are accessible on any device from any place with an Internet connection.
- You don't have to worry about the backups of your files?
- Each user receives at least 1 TB of storage space on OneDrive.

#4 Availability

Microsoft guarantees 99,99% availability of their offered services and largely proves it. If a server fails, another takes over automatically in a transparent way for the customers

#5 Microsoft Exchange online

Microsoft Exchange online is included in almost O365 subscriptions and offers plenty of advantages compared to a local Exchange server or other mail systems:

- Perfect synchronisation between devices of mail, calendar, contacts and tasks.
- No expensive investments for hardware, licenses and system management (updates, anti-spam, antivirus, backups, ...)
- At least 50 GB of storage for your mailbox

#6 Extra applications

Most subscriptions include very useful extra applications such as TEAMS and Sharepoint
